ABSTRACT

This is the 17th in a series of studies in educational philanthropy conducted by the Council for Financial Aid to Education since 1954-55. Roughly 1,000 institutions of higher education, both public and private, and 300 independent schools supplied the figures on which this report is based. This survey provides information on the voluntary financial support of educational institutions by source, purpose, and type of institution. Among the highlights of the report are that the total voluntary support of all institutions of higher education is up sharply over 1974-75, that all classes of colleges and universities reported increased support, that alumni support rose twice as much as support from any other source, that support for capital purposes was more than double that for current operations, and that increased bequests accounted for half the dollar rise in support from individual donors. Support for private elementary and secondary schools also rose sharply over the previous year. An appendix contains summary tables by class of institution. (Author/IRT)

VOLUNTARY SUPPORT OF EDUCATION 1975-76

Prepared by the Council for Financial Aid to Education and jointly sponsored by the Council for Advancement and Support of Education the Council for Financial Aid to Education and the National Association of Independent Schools.

Highlights

HIGHER EDUCATION

The voluntary support of higher education increased on a broad front in 1975-76 and attained a new record high. The increase over 1974-75 amounted to 11.6% in total, and resulted from increased support by all groups of donors, to all types of institutions, for all categories of purpose. Most of this rise in support appears to be associated with the recovery of the national economy. In the perspective of time, the recent trend of voluntary support has failed to match the rate of inflation and the growth of enrollment.

Total Support Rises Sharply. The total voluntary support of all institutions of higher education is estimated at $2.410 billion in 1975-76, up 11.6% from 1974-75, and a new record high.

Gains Widespread Among Institutions. All classes of colleges and universities reported increased support in 1975-76. The private institutions reported a gain of 12.8% while the increase for public colleges and universities was 9.4%.

Increased Alumni Support Dominant. Increased support was reported from all identifiable donor groups, but alumni giving recorded a spectacular rise of 23.3%, more than twice as big an increase as that from all other sources combined. Foundation support rose 12.5% and support from religious denominations increased 11.3%.

Capital Giving Up More Than Current Support. Voluntary support for capital purposes increased 18.8% in 1975-76, recovering the level of 1973-74. Support for current operations rose 9.2% and accounted for 58.9% of the total. There were large increases in unrestricted support and in support for all the designated uses for which support is given.

Bequests Up; Deferred Gifts Down. Increased bequests accounted for half the dollar rise in support from individual donors. There was a small decrease in the reported level of deferred giving. College and university endowments rose to an all time high in both book and market value.

The number of colleges and universities participating in the 1975-76 Survey was 991, five more than in 1974-75. The year-to-year trends and other comparative findings are derived primarily from an analysis of data supplied by 811 institutions that took part in both the 1974-75 and 1975-76 Surveys.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

The voluntary support of independent schools increased substantially in 1975-76. The average amount reported per institution increased 13.6%, and for the 223 schools taking part in both the 1974-75 and 1975-76 Surveys the increase amounted to 12.8%.Most of the year-to-year increase was due to a 27% gain in alumni support.

PREFACE

The *Survey of Voluntary Support of Education, 1975-76*, is the 17th in a series of studies in educational philanthropy dating from 1954-55. The cooperative sponsorship of the recent Surveys by the Council for Financial Aid to Education, the Council for Advancement and Support of Education, and the National Association of Independent Schools has resulted in a single survey that is the only authoritative and detailed source of information on the voluntary financial support of educational institutions.

College and university participation in the 1975-76 Survey was slightly above the 1974-75 level. The number of private pre-college schools in the 1975-76 Survey, however, was 24% greater than in the 1974-75 Survey. The following table summarizes the entire participation record for 1975-76:

The definitions used in the 1975-76 Survey are the same as those used in 1974-75 and prior years. Voluntary support, as defined in *Gift Reporting Standards*, excludes income from endowment and other invested funds as well as all support received from federal, state, and local governments and their agencies; in editing the survey questionnaires, the CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory, 1975-76*, published by the U.S. Department of Health, Education, and Welfare, National Center for Education Statistics.

Since 1965-66, the Survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy.

Back issues of the printed reports for the years since 1971-72 are available from the Council for Financial Aid to Education. The reports for all Survey years prior to 1971-72 are now available on microfiche in complete sets, and may be obtained from the Council for Advancement and Support of Education.

The data in these reports are the result of countless hours of work by many individuals. To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE, and NAIS express their gratitude.

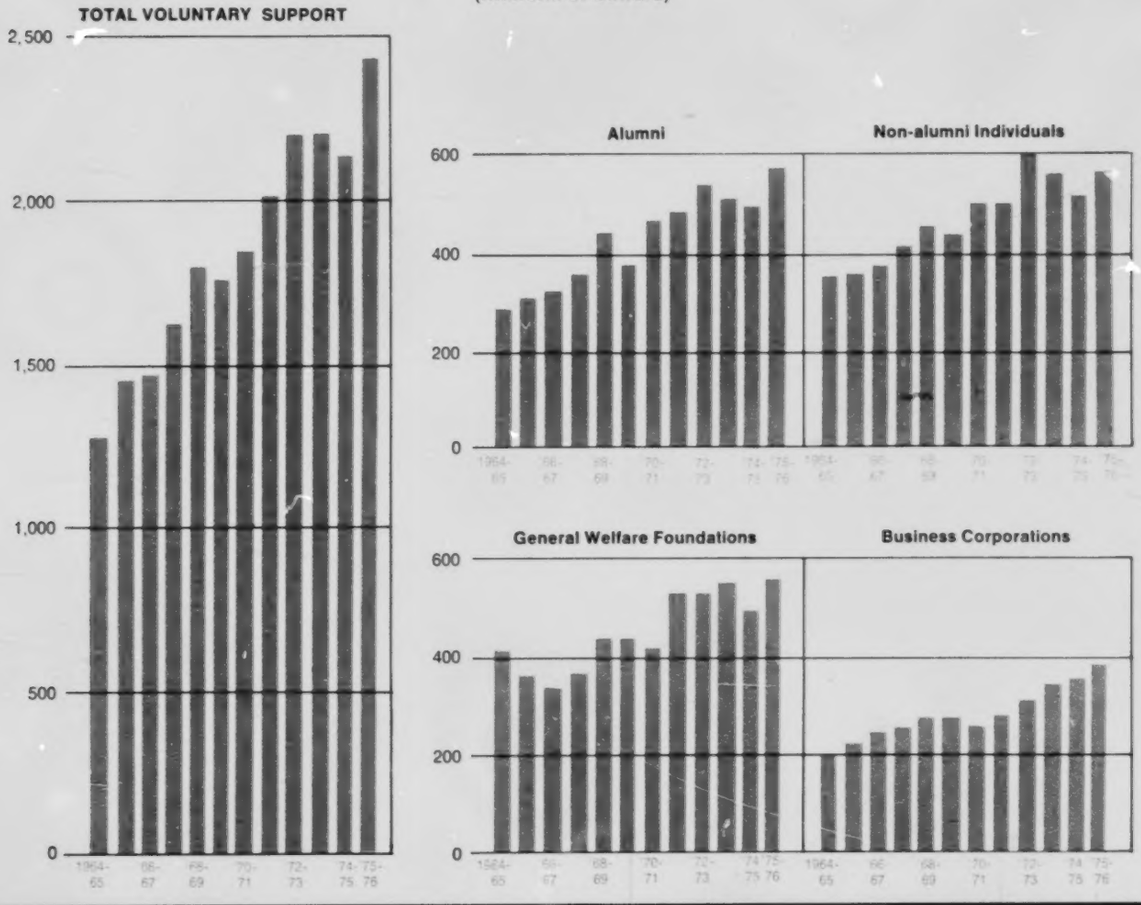
NATIONAL ESTIMATES

The voluntary support of higher education increased on a broad front in 1975-76 and attained a new record high. The increase over 1974-75 amounted to 11.6% in total, and resulted from increased support by all groups of donors, to all types of institutions, for all categories of purpose. Most of this rise in support appears to be associated with the recovery of the national economy. In the perspective of time, the recent trend of voluntary support has failed to match the rate of inflation and the growth of enrollment.

The voluntary support of colleges and universities increased from $2.160 billion in 1974-75 to a record level of $2.410 billion in 1975-76, a gain of 11.6%. These estimates, which are prepared by CFAE, reflect the findings of the Surveys of Voluntary Support of Education and other information.

Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total

(millions of dollars)



The rise of voluntary support of higher education in 1975-76 is the largest year-to-year increase since 1968-69. However, in view of the 3.6% decrease in voluntary support in 1974-75, the two-year increase amounts to only 7.6%, and this is one of the smallest two-year gains on record. Both the dip in 1974-75 and the sharp rise in 1975-76 appear to have been influenced primarily by economic factors in the United States during the period from 1974 to 1976.

The increase in voluntary support in 1975-76 was widely shared among the various types of institutions of higher education, it was reflected in increased levels of support from all the identifiable classes of donors, and it affected all the categories of purpose for which voluntary support is given.

In terms of the recipients, the experience of the various classes of colleges and universities participating in the Survey may be found in Tables 3a and 3b (pages 7 and 8). For the first time since 1968-69, the private institutions reported larger gains in support than the public institutions. However, all classes of colleges and universities reported substantial increases in 1975-76.

In terms of sources, increased support was received from all identifiable donor groups. Estimated voluntary support from institutional alumni and alumnae increased 21.0% and reached a new record high; this increase accounted for more than 40% of the dollar increase in estimated total support. The support recieved from religious denominations rose 16.1% and reached the highest level since 1967-68. Estimated support from non-alumni individuals gained 10.3%, foundation support rose 10.4%, and support from business corporations increased 6.2%. Both foundation support and business support in 1975-76 were at new record levels. Details from the Survey are shown in Tables 4a and 4b (pages 9 and 10).

Support allocated for capital purposes rose 19.0% and accounted for about 60% of the dollar increase in estimated total support. However, this gain was equal to the decline in capital support in 1974-75 and it merely restored the dollar total of capital support to its 1973-74 level. The allocation of voluntary support by specific purpose category shows a significant increase in unrestricted support and large gains in support for each of the designated purposes for which support is given. See Table 6 (page 60) for specific details.

ECONOMIC FACTORS IN VOLUNTARY SUPPORT

Just as a sluggish economy and a depressed stock market had had an adverse effect on voluntary support of higher education in 1974-75, so also did the economic recovery have a stimulative effect on voluntary support in 1975-76.

Foundation support of education, for example, is tied closely to the total payout of the private foundations, and the total payout is influenced by both the level of earnings on foundation investments and the valuation of foundation assets. As indicated on the chart on page 3, foundation support of higher education was relatively stable between 1971-72 and 1973-74, a reflection of a relatively high and stable level of securities earnings and prices between 1971 and 1973. The slump in stock prices in 1973-74 was reflected in a significant decrease in foundation payouts in 1974-75, and the recovery of stock prices in 1975-76 was influential in expanding such payouts.

Similarly, the behavior of corporate support of higher education is traceable to the fluctuations in corporate earnings. Profits before taxes were in a rising trend between 1970 and 1974, with an average growth rate of more than 15% annually. Between the third quarter of 1974 and the first quarter of 1975, corporate profits plunged more than 32%, to be followed by a recovery that continued at least through the end of 1976. Corporate support of the institutions of higher education followed a similar path; it rose nearly 11% per year between 1970-71 and 1973-74, it increased by less than 1.0% in 1974-75, and it showed a 6.2% gain in 1975-76. The 1974-75 results would undoubtedly have been more severe but for the fact that many large corporations have foundations which act as buffers between profits and contributions.

In the case of individual donors the pattern is much the same. Voluntary support received from alumni and non-alumni individuals fell 11.8% between 1972-73 and 1974-75, and nearly 85% of the decline is traceable to outright and deferred capital gifts by living donors. Since such gifts are heavily weighted by large contributions of appreciated securities and other property, the decline appears to be wholly attributable to the slump in the stock market. Similarly, the increase of support from individual donors in 1975-76 is largely the result of the recovery of stock prices after the end of 1974.

Assuming a continuation of the economic recovery through the academic years 1976-77 and 1977-78, the prospects for further increases in the voluntary support of higher education at rates comparable to that of 1975-76 would appear to be excellent. In view of the financial pressures being experienced by the institutions of higher education, such a prospect would be doubly welcome.

VOLUNTARY SUPPORT IN LONG-TERM PERSPECTIVE

Despite the large gain in total voluntary support in 1975-76, the growth of such support in the past decade has been inadequate both in terms of past experience and in terms of the needs of the colleges.

It is clear that the growth of voluntary support has been slower since 1965-66 than it was in previous periods. As indicated in Table 2, the rate of growth of voluntary support between 1965-66 and 1975-76 averaged only 5.3% per year. By contrast, the growth rate averaged 11.9% per year between 1949-50 and 1965-66, and for the forty-year span from 1909-10 to 1949-50, which included two major wars and the Great Depression, it averaged 6.0% per year.

The decrease in the rate of growth of voluntary support since 1965-66 is one of the causes of the financial crisis that has overwhelmed higher education in recent years. The total current and capital expenditures of colleges and universities increased at an average annual rate of 11.7% between 1949-50 and 1975-76, and the variations from this average have been minor—for the sixteen years prior to 1965-66 the average was 11.9% per year, and for the ten years after 1965-66 it was 11.4%. The principal factors responsible for this rapid growth in recent years are inflation and the growth of enrollment. Prior to 1965-66, an important part of the rise of expenditures was due to increases in the "real" (ie., constant dollar) cost of education per student—increased faculty-student ratios, a rise in the number of course and program offerings, expanded amounts of physical facilities, and similar gains in other elements of the quality of education. This "real" cost per student has since turned downward, and for the period from 1965-66 to 1975-76 it decreased roughly 10%. The actual cost per student, on the other hand, has increased steadily because of inflation, and in the period from 1965-66 to 1975-76 the rise amounted to more than 50%.

1970-71 to 1975-76	5.4	6.9	5.3	—0.2	—6.5	10.6	4.8	—2.0

As indicated in Table 2, voluntary support since 1965-66 has failed to keep pace with either enrollment or inflation. Indeed, voluntary support per student, adjusted for inflation, has decreased by more than 6% per year, on the average, and in 1975-76 was about the same as it was in 1949-50, well below the level of 1909-10.

This development indicates clearly that there is an urgent need for a further encouragement of educational philanthropy. While the voluntary support picture in 1975-76 is welcome, the increases must be sustained in the years ahead if private giving is to continue to underwrite a significant share of educational costs.

THE SURVEY RESULTS

VOLUNTARY SUPPORT, BY TYPE OF INSTITUTION

All classes of colleges and universities reported substantial gains in voluntary support in 1975-76. For those institutions reporting in both 1974-75 and 1975-76 the overall gain amounted to 12.0%. Private colleges and universities reported an increase of 12.8%; the gain for public institutions amounted to 9.4%.

The total amount of voluntary support tallied by all the institutions of higher education participating in the 1975-76 Survey was $1.891 billion, a new record high. It exceeded the amount reported in the 1974-75 Survey by $216 million, or 12.9%. This gain reflects a small increase in the number of participating institutions, from 986 to 991, and a rise of 12.4% in the average amount of voluntary support received per institution. The basic Survey data are shown in Summary Table I on pages 64-65. The amounts of total support, by class of institution, are shown in Table 3a, below.

* *Figures shown differ slightly from those published in the 1974-75 Survey Report; 7 institutions have been reclassified and the amount of support reported by them in 1974-75 has been allocated to the class in which they reported in 1975-76.*

The year-to-year experience of different classes of colleges and universities is most accurately indicated by the figures supplied by 811 institutions that participated in both the 1974-75 and 1975-76 Surveys, as shown in Table 3b. Further details, showing the changes in voluntary support for these institutions, by source, are given in Summary Table II on page 66.

For these 811 colleges and universities, total voluntary support increased 12.0% in 1975-76 over 1974-75. The gains in support were widespread and affected all classes of higher educational institutions. Some 62.3% of the private colleges and universities reported increased support, and in total their dollar amounts in 1975-76 represent an increase of 12.8% over 1974-75. Among the public institutions in this sample, 62.6% of them reported increased support, and their total showed a year-to-year rise of 9.4%.

Percentagewise, the largest increase was attained by the private professional and specialized schools; they reported an overall increase of 67.8%, the bulk of which was received from non-alumni individuals and private foundations. The private men's colleges reported the second largest increase, some 34.7%, nearly all of which came from their alumni. The major private universities and the private women's colleges received 10.9% and 11.9% more support, respectively. For the former, the largest increase came from their alumni; for the latter, religious denominations and non-alumni individuals provided the largest increases.

The 389 private coeducational colleges reported the smallest overall year-to-year gain, 8.2%. Although these institutions received substantially increased support from religious denominations, alumni, and non-alumni individuals, they reported significantly less from "other" groups and sources. For all private colleges and universities combined, most of the 12.8% gain in support was attributed to increased funds received from their alumni and from private foundations.

In the case of four-year, public colleges and universities, a disproportionate part of their 9.4% gain in support was accounted for by higher levels of alumni giving, they also received significantly more support from business corporations and private foundations. For the two-year institutions in the sample, virtually all of the 11.8% increase in total support was attributed to non-alumni individuals and business corporations; they reported decreased support from their alumni and from private foundations.

Among all the institutions taking part in the 1975-76 Survey, the 20 colleges and universities reporting the highest totals of voluntary support were:

VOLUNTARY SUPPORT, BY SOURCE

Higher levels of voluntary support were reported for all of the major sources of educational philanthropy. Alumni giving rose by nearly one-fourth and in 1975-76 was the largest single source of voluntary support. There were also unusually large gains in support from foundations and religious denominations, and significant increases from non-alumni individuals and business corporations.

As indicated in Tables 4a and 4b, the increase in voluntary support in 1975-76 was widespread as to source. Increased gifts and bequests from individuals accounted for more than half of the year-to-year gain, but support from corporations and foundations also rose markedly. The religious denominations provided an important increase in their educational support, and the total from this source reached the highest level since 1967-68. Voluntary support received from "other" groups and sources, although up slightly for all institutions reporting, was down modestly for the 811 colleges and universities that took part in both the 1974-75 and 1975-76 Surveys.

Voluntary support received from individuals, which normally accounts for nearly half of the overall total, showed an increase of $131 million, or 16.8%. Although more than half of this dollar increase consisted of a 30.6% rise in the value of bequests (see also page 62), there was a 13.9% gain in voluntary support received from living donors.

The most significant development in the 1975-76 Survey is the large and widespread increase in alumni support. For the 811 colleges and universities taking part in both the 1974-75 and the 1975-76 Surveys, alumni giving rose 23.3% and became the largest single source of support. For the private men's colleges, the increase of alumni support amounted to 123.9%. Alumni giving rose 47.7% for the private professional and specialized schools, and 25.4% and 25.6% for the public colleges and universities and the major private universities, respectively. For the private coeducational colleges, alumni support increased 14.6%. By contrast, the two-year colleges reported 11.8% less alumni support in 1975-76 than in 1974-75; this marks the third consecutive year in which these institutions experienced a decrease in alumni giving.

Foundation grants to colleges and universities rose by 12.5% overall. The private professional and specialized schools reported the largest increase from this source, 133.3%. There was a 13.1% increase in the foundation support of private men's colleges, and gains of between 2.6% and 8.5% for the other classes of four-year institutions. The two-year colleges reported 2.0% less support from foundations.

The increase in the amount of educational support received from religious denominations was 11.3%. Support from this source is concentrated on the private institutions and, among this grouping, the largest increase, 19.8%, was reported by the women's colleges. The professional and specialized schools received 14.9% more, and the private coeducational colleges received 11.1% more, from this source.

Voluntary support from the business community was 8.7% higher in 1975-76 than in 1974-75, and increases were reported by all classes of institutions. Although the two-year colleges reported an increase of 21.6%

Technical Notes:

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for three reasons: (1) some multicampus institutions are shown in summary as well as in detail, (2) some of the component professional schools of major institutions are also listed separately, and (3) a few of the institutions not supplying complete information or reporting too late for computer tabulation are listed.

C. There were 63 institutions responding to the Survey invitation which are omitted from the tabulated data. These institutions include those which (1) were unable to supply any information, (2) received no support, (3) were unable to supply complete information, or (4) reported too late for computer tabulation. These institutions are listed separately on page 58.

in business support, the dollar amount constitutes less than one percent of total corporate support of higher education. Among the four-year institutions, the major private universities reported the largest increase in corporate support, 11.2%. The private men's colleges and the public colleges and universities each reported 9.1% more in corporate support.

Educational support received from business corporations through employee matching gift programs increased dramatically in 1975-76. There was a 9.8% increase in the number of gifts matched and a 8.8% increase in the average match per gift, resulting in a 19.8% increase in corporate support through this mechanism. At $14.1 million, matching gifts accounted for 4.7% of total corporate support reported by colleges and universities in 1975-76, which compares with 4.3% in 1974-75.

The amount of voluntary support reported from "other" groups and sources decreased 2.5% in 1975-76. With the exception of small increases reported by the major private universities and the public colleges and universities, decreases in support classified under this heading were widespread. There had been a large gain in voluntary support from these "other" sources in 1974-75; the 1975-76 result, therefore, may be simply due to better reporting procedures.

* It should be noted that the 1968-69 figure for total alumni giving includes one nonrecurring gift of $40 million.

The large gain in alumni giving is reflected in greatly expanded alumni support of Annual Funds. There were 5.6% more colleges, universities, and independent schools reporting these data in 1975-76 than in 1974-75. They reported a 7.5% gain in the number of alumni donors to their Annual Funds, and a 12.5% increase in the dollar amount of their gifts. The average alumni gift to the Annual Fund, therefore, increased 4.7% to $73.86, an all-time record high. The participation rate, based on the number of alumni solicited for Annual Fund gifts, rose to 17.9%, the highest level since 1968-69. As indicated in Table 5, the record shows a persistent rise in Annual Fund support both in dollars and in size of average gift.

VOLUNTARY SUPPORT, BY PURPOSE

Although a disproportionate part of the increase in voluntary support in 1975-76 was earmarked for capital accounts, there were significant gains in unrestricted support and support for all the specific purposes to which voluntary giving is either designated or allocated.

The distribution of voluntary support in 1975-76 by purpose, as reported by all the colleges and universities participating in the Survey, is shown in Table 6, together with similar data from the 1974-75 Survey. Of the $216 million increase in the amount of total support reported, $123 million, or 56.8%, was recorded in the institutions' capital accounts, and this implies an increase of 18.8% over 1974-75 for this category of support. Current operating funds support, however, rose 9.2% in 1975-76 and continued to account for nearly three-fifths of the total.

CAPITAL PURPOSES	$ 654,802	(39.1)	$ 777,628	(41.1)	+18.8

The increase of support for capital purposes was greater than the increase of support for current operations for the major private universities, private men's colleges, private women's colleges, and the private professional and specialized schools. For the latter group, capital giving rose 94.8% in 1975-76, while support for current operations actually decreased 4.2%. Support for capital purposes rose 68.9% for the private men's colleges, 23.4% for the major private universities, and 20.6% for the private women's colleges.

The relative importance of support for current and capital purposes, by type of institution and by class of donor, is shown in Table 7. At 39.1% of the total, support for capital purposes was at an all-time low in 1974-75. The relatively large increase in 1975-76 raised capital support to 41.1% of the total, but this is still the second lowest level on record and significantly lower than in any year prior to 1974-75.

For private institutions, voluntary support for capital purposes, including endowment, has traditionally accounted for more than half of the total, and this was especially true for all groups of private institutions other than the major universities. Although the decrease of capital support in 1974-75 had reduced it below 50% in importance for all classes of private institutions the gain in capital support in 1975-76 raised it above 50% only for the private men's colleges, private women's colleges, and the private professional

and specialized schools. For the private coeducational colleges, capital support fell in importance from 47.9% to 46.7% of the total, a new record low for these institutions.

By contrast, the public colleges and universities have traditionally received more for current operations than for capital purposes, and in 1975-76 current operating support rose to 75.3% of their total support, which is a new record high. The two-year institutions have had a highly variable experience over the years, due in part to the changing mix of private and public colleges. As recently as 1972-73 current operating support accounted for less than half of total support, but in the last three years it has risen rapidly and in 1975-76 equalled 69.0% of the total, a record high.

In terms of sources, the disproportionate rise of support for capital purposes is almost wholly attributable to individuals and foundations. However, the basic patterns remained largely unchanged. Foundations, corporations, religious denominations, and "other" sources of support have historically favored current operating support over capital giving, and the pattern did not change significantly in 1975-76. The preference of individual donors, on the other hand, has traditionally been slanted towards capital gifts, and this pattern was reinforced in 1975-76.

In terms of the specific categories of support, unrestricted giving increased 14.2% in 1975-76 and continued to account for about one-third of total support. Among the designated purposes of support, giving for faculty compensation and for student aid rose 17.8% and 16.0%, respectively, and increased slightly in relative importance. Research support rose 10.6% in dollars but fell from 15.0% of the total in 1974-75 to 14.7% in 1975-76.

BEQUESTS, DEFERRED GIVING AND ENDOWMENT FUNDS

Bequests increased 30.6% in dollar amount, and from 27.5% to 30.8% of support received from individual donors. Deferred giving decreased 7.0% in dollar amount. Both the book value and the market value of endowment funds rose to new record highs in 1975-76.

As noted in Table 4a, the value of bequests reported in 1975-76 increased 30.6% over 1974-75. Relative to total voluntary support, bequests increased in importance from 12.8% in 1974-75 to 14.8% in 1975-76. In relation to support received from individual donors, bequests rose from 27.5% of the total in 1974-75 to 30.8% in 1975-76. All classes of four-year institutions reported increased support in this form.

Table 8. ***Forms of Individual Giving as a Percentage of Voluntary Support by Individuals***

Year	Bequests	Deferred Giving	Year	Bequests	Deferred Giving
1966-67	25.5%	6.1%	1971-72	32.0%	6.4%

1970-71	34.9%	3.9%	1975-76	30.8%	6.3%

There was an apparent decline of 7.0% in 1975-76 in the dollar value of deferred giving. However, the 1974-75 tabulation included one gift of $8 million by one individual to one institution; excluding this single gift, the 1975-76 total shows a gain of 6.9%. In relation to total support from individual donors, the 1975-76 level of deferred giving was 6.3%, the lowest since 1970-71.

The endowment funds of the reporting colleges and universities reached a new record high in 1975-76, measured both in book value and in market value. The former amounted to $12.0 billion, up 7.4% over 1974-75; the latter amounted to $13.5 billion, an increase of 12.2%. In both cases, the results are distorted slightly by variations in the number and identities of the reporting institutions.

Private Secondary and Elementary Schools

THE SURVEY RESULTS

Voluntary support of independent schools increased substantially in 1975-76. The average amount reported per institution increased 13.6%, and for the 223 schools taking part in both the 1974-75 and 1975-76 Surveys the increase was 12.8%. Most of the year-to-year increase was due to a 27% gain in alumni support.

A total of $112.4 million was reported by 338 schools in the 1975-76 Survey, roughly 41% more than the $79.6 million reported by 272 schools in 1974-75. Voluntary support per school reporting, therefore, gained 13.6%. There were 223 schools taking part in both the 1974-75 and 1975-76 Surveys, and they reported an increase from $73.9 million to $83.3 million, or 12.8%.

Alumni support increased 27.0% in 1975-76, and the dollar increase in alumni giving accounted for more than 70% of the dollar gain in overall voluntary support. Most, if not all, of this rise in alumni giving appears to have been support for capital purposes. Alumni support of Annual Funds showed an increase of only 0.6% in the size of the average gift, and the participation rate was unchanged at 23.3%.

Support from "other" sources rose 43.6%, but the dollar amount was less than 5.0% of total support. There was a gain of 7.4% in support from non-alumni individuals. Support from business corporations, which represents less than 3.5% of the total, decreased 21.5% in 1975-76. Foundation support fell 1.3%, and support from religious denominations decreased 6.5%.

The ten schools reporting the largest support totals in 1975-76 were:

PHILLIPS ACADEMY-ANDOVER (MASS.)	$2,611,235	MIDDLESEX SCHOOL (MASS.)	$1,784,171
DURHAM ACADEMY (N.C.)	2,582,787	CHOATE ROSEMARY HALL (CONN.)	1,762,615
DEERFIELD ACADEMY (MASS.)	2,434,787	GROTON SCHOOL (MASS.)	1,661,307
HOTCHKISS SCHOOL (CONN.)	2,262,406	WOODWARD ACADEMY (GA.)	1,636,495
ST. PAUL'S SCHOOL (N.H.)	2,091,769	IOLANI SCHOOL (HAWA.)	1,615,145

Using the amounts reported by all 338 schools, support for capital purposes rose from 56.9% of the total in 1974-75 to 61.6% in 1975-76. There were gains in both bequests and in deferred giving; in relation to total support from individual donors, these forms of giving increased from 10.4% to 11.3% and from 0.6% to 2.1%, respectively. Endowment funds increased, both in book value and in market value, but most of the increase reflects the rise in the number of schools reporting:

Note: The year-to-year changes shown in this table are not all of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising drives, the timing of corporate and foundation programs, large bequests and other non-recurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

In every Survey, each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one Survey to another. See Page 7 for a comparison of 1974-75 and 1975-76 data on an adjusted basis.
